

Introducing *IronPort*....

E-mail filtering at its best!

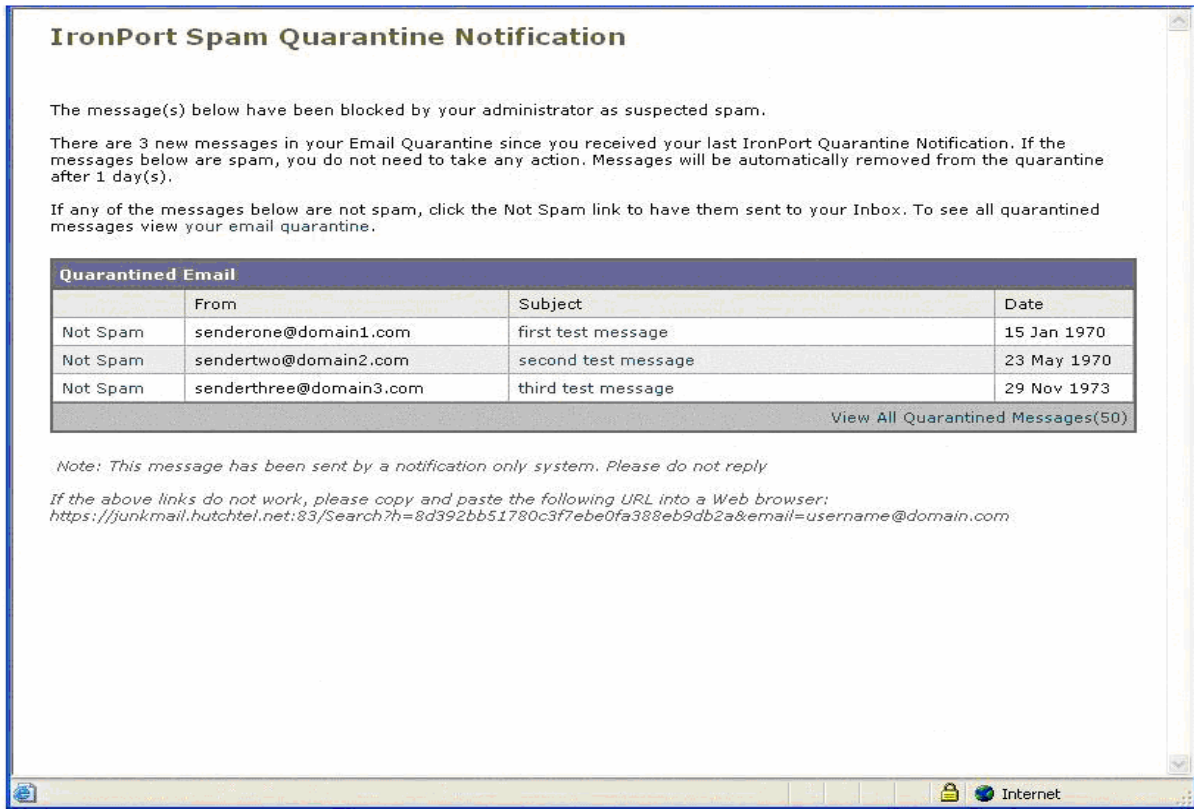

Hutchinson Telephone Company is excited to announce that starting June 1, 2006 we will be in the process of replacing the current *antispam/antivirus* e-mail filter appliance known as **Postini** with a **New** more **Robust** appliance called **IronPort**.

IronPort will quarantine suspected messages for you just as Postini did but it will also offer **Better & Earlier Virus Protection, Improved Virus Outbreak Filtering, Enhanced Security, Multi-Layered Spam Filtering, and Outgoing Mail Protection**.

You will be able to view and release any quarantined messages that are captured by this service. However, for a short time, until the new service is fully implemented, you will only be able to view your quarantined mail through an email you will receive every day. Below is an example of the type email you will receive informing you of your quarantined email messages.

The email will list the messages that are new to your quarantine list. To view your entire quarantine list, you can click on the [your email quarantine](#) link in the message or you may click on the [View All Quarantined Messages](#) link below the date column in the listing of messages. Clicking on **either** of these links will open another window for you to view all of your quarantined messages. You will not need to enter or remember your username or password.

Clicking on "Not Spam" next to a message in the list will deliver the message to your mailbox. To delete the quarantined items from your mailbox, follow the procedure above to open the entire quarantine list. From there you will be able to delete any or all messages quarantined by **IronPort**.

Clicking on any of the emails in the list you receive will open up a screen like the one below. Here, you can get more details about the email that was quarantined. You can release the email for delivery by clicking on the “Not Spam” button or delete the email from your quarantine list in **IronPort** by clicking on “Delete”.

Note: Any messages older than 14 days will automatically be deleted by ***IronPort***

Once again, the only way to view your quarantined messages at this time is through an email notification you will receive each day. If you wish to view your messages at **any time**, all you need to do is simply keep at least one of the notification messages that have been sent to you. From that notification you will be able to log in at anytime to view your quarantined messages.
